## Student Representative Council Resource Kits

Second Strike has prepared several kits focused on supporting Student Representative Councils in primary or secondary schools.

The purpose of these kits has been to condense into a small package the vast accumulation of ideas, information, experience, tricks and suggestions that Second Strike has been fortunate enough to witness and be a part of over the years.

These kits are really very much like a Second Strike training session in written form. Nothing beats actually holding a training day for the SRC, but these kits can be a permanent presence through the year reinforcing your work.

These kits are appropriate at both primary and secondary level.

We have spent a great deal of time crafting these kits, and we are very proud of them. SRCs are the organisations we believe to have such great potential that we have dedicated so much of our efforts to them. In the same way we work hard on our tailor-made training days to make sure they are just right, so too we have tried to make everything in this kit of the same explosive potential.

Not every idea in these kits will be to your taste as every SRC is different. Take what we have and enjoy; do something wonderful with it!

Fill out the form on the reverse and return it to the address beneath, including payment, and your copies will be rushed out to you. Please be aware that sometimes a kit is out of stock and it may take us a few days extra to get your copies to you.
